

# Aiko SecuBox

## Version 1.6

SecuBox is an easy-to-use encryption solution to secure confidential data on Windows Mobile devices. SecuBox provides on-the-fly encryption of sensitive data stored on Windows Mobile devices and their media cards. SecuBox seamlessly integrates into Windows Mobile File Explorer. No user training is required.

Recent reports of data breaches together with compliance regulations such as the HIPAA, GLBA, Sarbanes-Oxley Act and European Data Protection Directives, urge mobile users to secure their confidential data. SecuBox offers a comprehensive way to protect data on theft-prone mobile devices thus preventing data leakage, securing business assets and protecting brand reputation.

### Benefits:

- Strong industry standard encryption (AES 256-bit algorithm)
- Protects valuable corporate and personal information
- Guards against data theft and unauthorized access
- Secure data - both on Windows Mobile phone and its media cards
- Fast and efficient support
- Comprehensive licensing

# Aiko SecuBox

## How SecuBox Protects Data:

SecuBox creates an encrypted volume that looks and feels like another Windows Mobile storage card. Data encryption happens automatically, files are encrypted on-the-fly when they are written to the encrypted card, and decrypted when read from the card.

With its seamless integration into day-to-day routines, SecuBox becomes an optimal choice for busy professionals who need efficient solution to their mobile security needs. Encryption key backup, file wiping compliant with the U.S. DoD 5220.22-M specifications, command line support and many other features will satisfy corporate environments and more demanding users.

## Key Features:

- **Advanced Encryption Standard** (AES 256-bit algorithm)
- **Secure “wipe file”** functionality irretrievably deletes data.
- **Command-line** for integration into batch processes
- **Storage inactivity timeout** and **Unmount on Sleep** protects your data on the go. The encrypted storage will automatically unmount if it hasn't been used for a specified period of time.
- Compatibility with Dekart Private Disk, advanced disk encryption software for Windows desktops
- SMS unmount

**Language Versions:** English, Japanese
